THE SPECIFIC COPTING HERCHATCH AFFECTIN. THE NATIONAL DEFENSE OF THE 100 THE 1

THIS IS UNEVALUATED INFORMATION

- The Hungarian factory for transmitter tubes at 169 Vaci ut in Budapest XIII, was a nationalized plant controlled by the Hungarian Ministry of Machine Industry Bomb damages suffered by the installation during the war were repaired between 1948 and 1950. Only minor reconditioning work was executed in 1952 and 1953.
- 2. Arpad Ermer, a Communist Party member, was general manager of the plant. The plant management also included:
 one Carei (fru), an expert, who had been awarded a high order by the Hungarian Feorle's Democracy:
 Lajos Alex
 Arpad Szentes, chairman of the workers' council, a Stakhanovite and Communist.

- 3. The monthly output of the installation was 15 to 20 transmitter tubes, 1,000 to 1,500 miniature transmitter tubes, and an undetermined number of X-ray tubes. Most of the tubes were reportedly exported to Bulgaria, Red China, and the USSR. 1
- 4. The work force of the installation totaled about 800 persons about 40 percent of whom were women. All of these employees worked on one shift. Civil defense courses were held and the World War II air-raid shelters were still available.
- 5. The installation received its power from the muricipal power system. Class required for the manufacture of tubes was furnished by the glass factory at Tokod, semi-finished products of all kinds were furnished by the telecommunications engineering plant at 10 Parisi utca in Budapest IV. The installation was not provided with a railroad connection.
